OUR FIRST TWENTY YEARS...

At Crownline we began at the drawing board with a very simple concept, giving the customers what they want. Throughout the last 20 years we have designed and produced high quality boats through customer innovation.

In the Early years our tagline was "STRIVING TO BE THE BEST" over the past 20 years we have proven we are one of the best becoming a premier boat manufacturer with distribution all over the world.

AND NOW FOR THE NEXT TWENTY YEARS.

Our process still begins at the drawing board with the same concept in mind, giving our customers what they want. We listen and we learn from our customers which is why our boats are loaded with standard features. At Crownline we are committed to providing value and quality in every boat to improve your time on the water.

- Unparalleled Design
- Unbelievable Attention To Detail
- Unequaled Value

FIRST IMPRESSIONS ARE IMPORTANT

Crownline's "stare at me" flawless gelcoat that reflects the sexy, curvy style lines of our boats is sure to capture your attention and lure you in for a closer look. Next, you notice the meticulously thought out interiors, designed for driver and passenger comfort, convenience and safety. The rich, luxurious upholstery invites you to climb aboard and settle in. Yes, what you see on the outside is definitely quite impressive. However, what's underneath will truly make you appreciate your Crownline ownership experience.

We realize that boats are meant to be a long term investment for your family. As you can see, Crownline boats are quality built for long lasting, trouble-free enjoyment. Even in this age of automation, we build our boats one at a time because we believe that quality control is significantly more important than automated production items. Your high standards are reflected in every boat that leaves our facility! You, our customer, are the key to our continued success and with every boat we build we promise quality, dependability and total satisfaction, guaranteed!

6. When the unit is extracted from the mold to reveal a lustrous finish, the investment in our wooden plugs, mold curing times, quality materials and maintenance schedule reveal their true value.

1. At Crownline, we believe the only way to ensure a flawless finish is to use traditional wooden plugs, even though this process is more expensive and labor intensive than other methods. Our hands-on process ensures exceptional fit and finish quality and allows us the freedom to design in as many curves and style lines as we desire.

2.& 3. Crownline molds are stored indoors in a specifically controlled environment and are carefully covered to protect them from dust, debris, scratches, and even fingerprints when they are not in use. The molds are maintained utilizing a strict, meticulous schedule during which molds are re-waxed after every pull, and removed from production to be thoroughly stripped, cleaned and re-waxed following an established number of pulls. This high maintenance, labor intensive level of care results in the lustrous, "mirror" gelcoat finish that Crownline boats are so well known for.

4. Gel coat is applied to the mold in our state of the art, environmentally controlled gel coat booths. At Crownline, quality is significantly more important than faster, more automated production processes. Because of our processes and commitment to quality, Crownline consistently measures 95-99 on a 100 point scale for "luster", as measured by our industry leading gel coat supplier!

5. Our laminators use flashlights while rolling the skins smooth to eliminate air bubbles and the possibility of voids. This close attention to detail is imperative due to the many curves and contours in the designs of our molds, guaranteeing the cosmetics on our exterior gel are impeccable.

7. At Crownline, all engines and drives are installed by highly skilled technicians who are trained, tested and certified by Mercruiser. And they must be recertified each and every year.

8. Every Crownline boat is thoroughly inspected at crucial intervals during the entire build process. Once the boat has passed our rigorous on-water test, it is then subjected to one more extremely thorough final inspection. Our in-house inspection experts carefully examine every boat from bow to stern and must personally sign off on the final condition of the boat before it leaves the plant.

LAKE CROWNLINE

CROWNLINE: Crownline was founded and incorporated in 1990 and since that first boat rolled off the line on March 25, 1991, we have continued to set the industry standards with innovative design philosophies that set us apart from all the rest. Today we remain a dominant force in every major boating market. We attribute this success not only to our continually evolving innovative "signature" styling, but also to our uncompromising quality standards. At Crownline, we don't cut corners. Every boat receives numerous inspections throughout crucial stages of our build processes. And EVERY boat is lake tested at our facility prior to shipment. A better built boat is a better long term investment for you and your family. Live life! Live Crownline! We are committed to exceeding all of your expectations!

DESIGN: Crownline boats are without a doubt the most exciting and progressive boats on the market today. We have successfully married a sexy, sporty look with that of high sophistication, just the thing for boaters who desire comfort and convenience, yet still yearn for racy, sports car styling. Crownline interiors are conversation and entertainment friendly, designed for beauty as well as luxury, comfort and convenience. The fact that Crownline continues to be one of the top names in the boating industry can be attributed to the many innovative ideas incorporated into all of our boat designs.

STANDARD FEATURES: These attention-grabbing boats are loaded with well thought out, customer-driven standard features. By listening to our customers, experienced boaters who embrace the boating lifestyle, we have determined which value added standard features must be included on our boats to make your on-board times the greatest times ever! And, by making these features standard on our boats, we can purchase them in quantities and provide them to you at a better value.

RIDE: At Crownline, our strategic approach to deep-V hulls and fast planing times results in an exceptionally smooth and responsive ride. Our F.A.S.T. Tab[®] hull design ensures stability in high-speed turns, so you are always in control. The full length keel pad ensures planing efficiency by lifting the entire running surface of the hull. A vented chine hull minimizes drag to improve time to plane acceleration. Smooth, quiet and responsive, that's what you can expect from a Crownline boat.

QUALITY: Beautiful, eye-catching styling is important. However, when you are investing in a boat, you want one that is safe and well made. One that will provide years of enjoyment for you and your family. At Crownline, we use the highest quality products available. Every piece of equipment that goes into our boats is selected for its quality and marine durability. And we use proven

manufacturing techniques and methods that ensure world-class construction quality. Crownline boats are built to zero tolerance standards for the best quality and value in the industry. That's why we can offer one of the most comprehensive warranties in the industry!

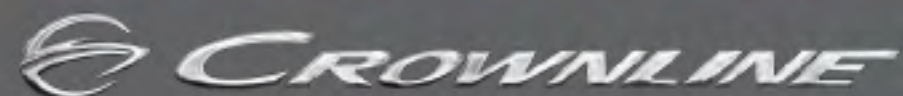

WARRANTY: We have complete confidence in the quality of our boats, the components we use and the craftsmen who use their skills and dedication to produce boats of the highest quality. As a result, we are proud to offer our "Best in Class" warranty coverage. We build Crownline boats so our customers can enjoy long lasting, trouble free fun on the water, with excellent warranty coverage for added peace of mind!

SAFETY: Safety always has been and always will be a priority at Crownline Boats. All of our boats are certified by the NMMA. Their certification requirements are based on the ABYC Standards and Recommended Practices for Small Craft. To be certified, a manufacturer must pass inspections that encompass a range of safety standards. In addition, we are also inspected annually by the Coast Guard and continue to receive exceptionally high marks from them for our boat building processes. Crownline boats incorporate an abundant amount of standard features that not only add aesthetic appeal to the boat, but also support increased safety. Our F.A.S.T. Tab[®] hull is designed to add stability in high-speed turns. Deep freeboards provide added safety and comfort for everyone that steps on board. Full beam swim platforms add boarding and exiting security. Pull up cleats, strategically placed grab handles and four step boarding ladders all help keep you and your family safe during all of your boating adventures!

OPTIONAL EQUIPMENT: In addition to the seemingly limitless number of standard features we provide, Crownline still allows you to express your unique style and needs by offering numerous option choices. You pick the engine. You choose the color and gel-coat configuration. You decide which seating configuration will work best for you and your family. Avid wake boarders can add the awesome looking tower, board racks, and tower speakers. The list goes on and on.

CROWNLINE'S COMMITMENT: Our dedication to outstanding quality and craftsmanship results in a better long term investment for you and your family. Throughout the years, Crownline boats have proven to have a higher resale value than those in our peer group!

CROWNLINE... THE TOTAL OWNERSHIP EXPERIENCE

Crownline continues to set the industry standards with new product development. Today we remain a dominate force in every major boating market with the introductions of five new models over the past eighteen months and three more to complete the 2012 model year. We attribute our success to not only our continually evolving innovations, but also our uncompromising quality standards.

INDUSTRY LEADERS WITH NEW PRODUCT

Although Crownline has our own in house design and engineering departments our best engineering team consists of our consumers. We build boats to exceed consumer wants and needs by listening to customer suggestions to improve your experience on the water. Customer driven designs are what sets Crownline apart from our competitors.
